

SWITCH TO REPAIR LAPTOP DONATION DISCLAIMER

Dear Donor,

Thank you for donating your unwanted laptop to the 'Switch to Repair' Campaign: A partnership between Derry City & Strabane District Council and Repair & Share Foyle, sponsored by Recycle your Electricals.

We appreciate your generosity in contributing to our mission of repurposing technology for the benefit of our community.

Please be informed that as part of our process, all data on donated laptops will be securely erased. Rest assured that your personal information and sensitive data will be handled with the utmost care and confidentiality. We process data-bearing assets from donating partners and sanitize them using approved data-wiping software. Data wiping stands as the sole assured method of data destruction, with each individual drive generating its own hard drive erasure report, certifying the date and method used. Devices failing the wiping process undergo physical destruction.

By donating your device to Repair & Share Foyle, you agree to release any liability associated with the handling and erasure of data from the donated device.

Thank you once again for your contribution to our cause. If you have any further questions or concerns regarding data erasure or our donation process, please feel free to contact us.

Sincerely,

Caroline McGuinness-Brooks
