2 Historic Buildings

There are 1268 structures recorded within the council area, of which, 680 are listed. 'Record Only' indicates a structure where a building was considered by the Department for Communities (or its predecessors) to be of sufficient interest to record and consider for protection as a listed building. Where 'D1' is included beside this, the record will have been taken in the early 1970's and a detailed record was not taken in more recent surveys. The first number in the reference refers to the former council areas (HB01 Derry City Council area, HB10 Strabane Council Area). The second number refers to the electoral ward and the third is the number of buildings surveyed within each. Some structures once considered for listing are now designated as Scheduled Historic Monuments. The Department avoids double designation so these are also indicated here as Record Only.

HB Reference	Address	Current Grade

3 Historic Parks and Gardens

A total of 21 Historic Parks and Gardens of which 8 are Registered and 13 are Supplementary. As of 2021, the historic parks, gardens and demesnes which have been selected for inclusion in the Register have been subdivided into three categories: - Grade A*, A and B. This grading system has been introduced with the 2021 revision of the Register to provide enhanced understanding of a site's significance and align with approaches adopted in other jurisdictions. This replaces the previous system where sites were divided between the Register and the supplementary list.

All sites are now contained within the Register: Grade B categorisation identifies those sites which would previously have been assigned to the appendix of supplementary sites. Table 1 contains a summary of the grading system and how it is applied.

- Grade A* Exceptional sites of outstanding regional importance
- Must fulfil seven criteria including Criterion 1.
- Grade A Sites of importance retaining substantial elements of their layout, character and historic integrity
- Must fulfil four criteria including Criterion 1
- Grade B Sites of importance but retaining only some elements of their original form (Formerly denoted as supplementary sites – SPPS 6.29 refers)
- Must fulfil two criteria including Criterion 1 (although this may relate to only certain key elements of the site)

Table 1. The Grading system for Northern Ireland's Registered Parks, Gardens and Demesnes of Special Historic Interest.

4 Areas of Archaeological Potential

Areas of Archaeological Potential are areas within settlements where archaeological remains are likely to be encountered during development. One Area of Archaeological Potential falls within the council area: defining the Walled City of Derry and historic core of the settlement.

5 Industrial Heritage Assets

A total of 1,479 Industrial Heritage Records fall within the council area.
