

## **DRUMAHOE, EGLINTON & LONDONDERRY FLOOD FEASIBILITY STUDIES**

AECOM have been commissioned by the Department for Infrastructure (DfI) Rivers to carry out a feasibility study for potential flood alleviation schemes in the Drumahoe, Eglinton and L/Derry Areas.

As part of this study, a topographical survey is required to determine the finished floor level of properties which will take place between October and November 2018. The survey work will potentially entail our surveyors taking ground levels within the grounds of your property. No access inside of your house is required. We assume that this is to your satisfaction; however, if you do not want your property to be included in the survey we would request that you inform us via the contact details below at your earliest convenience.

Also, if you have any information on historical flooding events that would facilitate our investigations (e.g. photographs, video footage, written accounts, damage costs) we would appreciate it if you could please send it to Mr Richard Reid, AECOM, The Clarence West Building, 2 Clarence Street West, Belfast, BT2 7GP or email it to [richard.reid@aecom.com](mailto:richard.reid@aecom.com).

We would like to take this opportunity to thank you in advance for your co-operation.
