Introduction

This report contains statistics detailing the ranking of the 40 new Electoral Wards (Ward2014), which nest within the seven District Electoral Areas in the Derry City and Strabane District Council area. There are a total of 462 wards across Northern Ireland and, as such, Wards are ranked from the most deprived (rank 1) to the least deprived (rank 462).

Rankings are available for each of seven distinct types (or domains) of deprivation, which have been combined to produce an overall multiple deprivation measure (MDM) rank. The MDM ranks of the areas should be considered in conjunction with those for each of the seven domains in order to gain a comprehensive picture of deprivation.

Users are encouraged to read the release note (link detailed below), which includes details on the approximation methodology and user guidance. It is recommended that these statistics are interpreted alongside the SOA-level measures with its detail on individual indicators, as well as the SA-level results that highlight small pockets of deprivation.

[Release Note - NIMDM2017 - Ward2014](#)

A link is also provided to the deprivation section of the NISRA website.
