1 Introduction

- 1.1 The Derry City & Strabane District Council Housing Monitor (HM) Report 2024-2025 has been prepared by the LDP Team within the Planning Department of Derry City and Strabane District Council. This is the latest in a series of annual summary reports, produced by the former DOE and then Derry City & Strabane District Council, to monitor the number of houses being built in each of the District's settlements and an estimate of the quantity of land remaining available for housing development across the District. This is an updated report following the 2019-2021¹ initial Council report and its subsequent updates; more contextual detail regarding Housing Monitors can be found in these previous reports. These reports and the previous summary reports from 2004 onwards are available on the Council's website at <https://www.derrystrabane.com/subsites/ldp>
- 1.2 The original objectives of the Housing Monitor were to guide Development Plan formation in Northern Ireland, and later, to correspond with the Regional Development Strategy's (RDS 2025, published 2001) objectives of managing housing growth and distribution. The subsequent (and current) RDS 2035 (2012) and several revised HGIs (Housing Growth Indicators) also seek to manage housing growth to achieve sustainable patterns of residential development. This includes the strategic objective to strengthen Derry as the principal city of the North-West, as well as the allocation and monitoring of housing growth at specific locations in the District through the LDP, to reinforce the leading role of the Hub towns – including Strabane, to achieve a complementary urban/rural balance to meet the need for housing in the towns of the District, and to meet the needs of the rural community living in smaller settlements and countryside.
- 1.3 The Planning Act (NI) 2011 (Section 3) sets out the requirement for the Council to undertake a survey of the land of the District and keep under review the matters which may be expected to affect the development of its District or the Planning of that development, which would include Housing. The Planning (Local Development Plan) Regulations (NI) 2015, Part 6, requires the Council to produce an Annual Monitoring Report (AMR), commencing once the LDP is adopted, which must specify the supply of land for housing and the number of net additional units built. This is in line with the requirement of the Strategic Planning Policy Statement for NI (SPPS, 2015) to have a 'plan, monitor and manage' approach, to maintain an adequate supply of housing land.

¹ This initial report spans a two-year period with subsequent updates following annually

- 1.4 Therefore, although it is not a legislative requirement to monitor housing land in advance of LDP adoption, it is considered to be good practice, and an important part of the ongoing LDP preparation, to monitor housing completions each year and the resultant level of housing land supply within settlements of the District.
- 1.5 The role of a Housing Monitor is to;
- Monitor the course of housing development in settlements with regard to RDS and HGI objectives;
 - Monitor the progress of housing development in settlements in accordance with the provisions of prevailing Development Plans and the emerging LDP;
 - Inform the preparation of the LDP regarding the allocation of land for housing; and
 - To provide information on the available potential for further housing development in settlements.

2 Settlement Hierarchy and Context

- 2.1 The LDP Plan Strategy (PS) defines 47 settlements (mostly the same as the existing Area Plans) including;
- Derry City
 - Strabane Town
 - 3 Local Towns
 - 27 Villages
 - 19 Small Settlements

3 Methodology

- 3.1 The Housing Monitor has been undertaken to cover the period from 1st April 2024 to 31st March 2025. Most of the Housing Monitor sites have been carried forward from the previous year's Monitor (see paras 3.2 - 3.4 below for further details.) Any new sites or amended permissions were filtered and extracted from the list of Planning permissions that were granted in the 2024-2025 year. Site visits for existing and new monitor sites were carried out in the spring of 2025. For ongoing housing developments, on occasion, officers were required to estimate the number of units which would have been considered complete (in Monitor terms - weatherproof, with doors, windows, and roof) at end of March 2025. (If they appeared to have been completed very recently, they will be included in the next count for 2025/2026.) On a number of the larger sites, it was appropriate to also use aerial / online imagery and Completion Certificate information from Building Control to check that, as far as possible, only those units completed in the 2024/2025 period were included in this Monitor.

- 3.2 The Monitor was undertaken for all settlements currently defined in the existing Derry Area Plan 2011 and the Strabane Area Plan 2001. It does not count dwellings in the countryside i.e. outside of settlement limits. It recorded the development status of those sites listed on the preceding Housing Monitor that were either classed as 'not started' or 'development ongoing'. It counts the number of dwelling units completed during the Monitor period for each site and also details the remaining development potential. This information is then totalled for each settlement across the District.
- 3.3 The Housing Monitor considers those sites zoned for housing, within the city / towns of the existing Area Plans, as well as any sites approved for residential development - in all settlements, through a Planning permission (including through the appeal process). It also includes projection sites from the earliest monitors; these are usually parcels of whiteland that were not yet approved or developed for any particular use at the time of setting up the first Monitor, but which have since received Planning approval for part or the entirety of the site.²
- 3.4 These sites were all assigned reference numbers as monitor sites; in the past, this was recorded on NILUD (Northern Ireland Land Use Database), but they are all now recorded on Excel spreadsheets. Removal of a site from the Monitor is generally only considered where a non-residential development commences on a substantial part of the site or the specific site has subsequently been refused Planning Permission (after the expiry of the appeal period) for the principle of residential development (or in the future, if the LDP removes a site's potential for residential development).
- 3.5 It is also considered to be best practice to keep sites in the Housing Monitor that have previously received Planning permission for housing, even though it has expired, unless there has been an obvious material change in circumstances such as would prevent a renewal or a further permission. However, a decision was taken that sites with only outline Planning permission (OPP) would not be visited; similarly, sites with a full or reserved matters Planning permission (FPP/RM) that have expired are given a final visit to determine if there was obvious evidence of a material start. While these OPP and expired FPP/RM sites are no longer visited (a new Planning permission or LDP zoning notwithstanding) they are still included as remaining potential in the Monitor figures for that settlement; such sites are 'greyed out' in the Monitor tables. (It should be noted that this HM categorisation exercise should not be taken as a formal/legal confirmation that a development has or has not lawfully commenced or that a Planning permission has been implemented).

² Those projection sites which have since been developed for non-residential uses have been removed from the monitor

- 3.6 There may be other parcels of land within settlements that are not included in the Housing Monitor. Such land becomes a 'monitor-able' site once it has been identified as suitable for residential development, through a Planning permission or a future LDP. Some of the small settlements currently contain no Housing Monitor sites; this does not necessarily mean that this settlement does not contain land that is suitable for housing. It should also be noted that the tables in Section 5 below only include current / recently active sites. Therefore, those Housing Monitor sites that were already completed before 2024-2025 are not included in these tables³.
- 3.7 In order to estimate potential dwelling numbers in situations where only the site area is known (especially for outline Planning permissions, where the exact number of dwellings is not known), an estimate of likely density is used. This is usually based on given characteristics such as the settlement type, site location, landform or adjacent development form and density. An average density may have been applied to the site, e.g. 25 units per hectare, or City = 40/ha; Main Town = 30/ha; Local Towns = 20/ha; Villages / Small Settlements = 10/ha if an informal / semi-rural setting. Clearly, where actual development densities in subsequent Planning permissions vary from that assumed, it will have implications for the accuracy of estimates compared with actual available potential. Adjustments, as necessary, will thus be made as part of the review undertaken in future Housing Monitor work.
- 3.8 Individual apartments are included in the Housing Monitor as dwelling units. The Monitor records net housing gain for each site. This involves taking account of existing housing that is lost as part of the development to make way for the new development.
- 3.9 It is also recognised that some potential housing land in settlements, including zoned housing land in relevant tiers, might not come forward for development due to a variety of reasons: unknown (at the time) constraints, economic issues or the refusal of landowners to release their land for development. These matters will be further investigated during the course of preparing the LDP Local Policies Plan.

³ With the exception of rectifying errors from previous years.

- 3.10 Housing Monitor methodology has evolved since its inception. Some previous years used Building Control completions data (see Table 3 below), provided through LPS and GIS. Accuracy has been dependent on the quality / compatibility of data supplied and GIS proficiency, as well as the reliability of the NI-wide NI Land Use Database (NILUD). Where discrepancies have been detected, these have been updated in the subsequent Housing Monitor and this may affect direct comparison with information from previous years.
- 3.11 To address these issues, and as with the previous Monitor (April 2023- March 2024), comprehensive monitoring has been undertaken manually with officers visiting sites during spring of 2025, recording the number of units which have been completed since the previous Monitor. Although a labour-intensive exercise, these Housing Monitor figures are considered to be robust and, additionally, this ensures that the Council has a much better understanding of the level / locations of housebuilding and of the remaining land availability across the settlement hierarchy. Moreover, all the Monitor sites are now listed within this report (Section 5) which makes the District's current housebuilding situation more transparent and helpful for the development industry, Planning and other stakeholders.

4 Headline Figures for Housing Monitor 2024-2025

- 4.1 A total of 548 housing units were completed within the District in the period between 1st April 2024 and 31st March 2025, with a remaining potential of approximately 12,716 houses.
- 4.2 Table 1 shows the number of dwelling completions in each of the settlements, at each of the settlement tiers – as per the LDP Plan Strategy. It also shows each settlement's approximate 'remaining potential' on Housing Monitor sites (i.e. estimated number of units that monitored sites could still accommodate).
- 4.3 Table 2 is a summary of the findings of Housing Monitor 2024-2025, set in the context of figures from the previous Monitors (note that some earlier year columns cover different number of years i.e. covering 1, 2 or 3+ years together so are not all directly comparable.) The LDP baseline date is 1st April 2017 so all future Monitors will count the cumulative total from that date – see applicable column. Usefully, this can be compared against the indicative share of the District housing numbers for each settlement as given in Table 2, Appendix 5 of the LDP Plan Strategy for the period from 2017 to 2032 (also shown in the final column of Table 2 within this document).
- 4.4 Table 3 is included, with the official Land & Property Services (LPS) figures from Building Control completions for the District, as a comparator check. Whilst the figures are not directly comparable, as they measure differently (different 'completion' standard / timing, relate to settlements only, etc.), they should broadly show similar trends such as 'strong' years and when there is a rising trend. The table also includes an indicative breakdown of the LPS build figures into 'Private / Speculative' and 'Social' houses built; this shows a useful private / social split over time, but it should be noted that these terms are not necessarily the same as used in the Planning LDP for 'affordable' houses.
- 4.5 The Housing Monitor 2024-2025 focusses on units built and available potential numbers, rather than the area of available land, which is less meaningful.
- 4.6 Behind the headline figures, Section 5 of this report sets out all the Housing Monitor sites for 2024/25, for each of the settlements across the District. These include any sites which are classed as 'ongoing' or 'not started', so they omit those sites marked complete in previous Monitor years.
- 4.7 Depending on available resources, it is intended that future Housing Monitors will be updated electronically with accompanying maps; hopefully, utilising the Planning Portal monitoring system (MasterGov) and latest GIS mapping.

Table 1(a): 2024-2025 Houses Built, per Settlement

Settlement Tier	Settlement	2024-2025 Housing Monitor Completions	2024-2025 Remaining Potential

**A grey entry indicates that this site was not visited in this year’s Monitor, usually because they are an Outline PP, or long-expired. Greyed-out sites will not be visited in future Monitors unless a new Planning permission is approved. These sites are however still counted in the Remaining Potential – still being a potential housing site. * This table only includes current / recently active sites. Therefore, those Housing Monitor sites that were already completed before 2024-2025 are not included in this table.*

Housing Monitor Sites* < 50 Units Derry City

Development ongoing										
Development not started										
Site is Completed in 2025 i.e. No Remaining Potential										
Site Visit not Necessary for 2024/25 -unless new Full or RM PP is granted

This Line is a total of the Derry H Sites, Other over 50's and the under 50's

**A grey entry indicates that this site was not visited in this year's Monitor, usually because they are an Outline PP, or long-expired. Greyed-out sites will not be visited in future Monitors unless a new Planning permission is approved. These sites are however still counted in the Remaining Potential – still being a potential housing site. * This table only includes current / recently active sites. Therefore, those Housing Monitor sites that were already completed before 2024-2025 are not included in this table.*

Housing Monitor Sites* Development Sites Strabane

Development ongoing

*A grey entry indicates that this site was not visited in this year’s Monitor, usually because they are an Outline PP, or long-expired. Greyed-out sites will not be visited in future Monitors unless a new Planning permission is approved. These sites are however still counted in the Remaining Potential – still being a potential housing site. * This table only includes current / recently active sites. Therefore, those Housing Monitor sites that were already completed before 2024-2025 are not included in this table.
